

## Preventative maintenance

Our preventive maintenance programs can be custom tailored to the needs of your equipment and production - and will help maintain the investment in your overhead crane and hoisting equipment as well as improve your production and plant safety. From simple quarterly services on a few pieces of equipment to complete full time on-site maintenance partnerships in facilities with hundreds of cranes, GD CRANE ELECTRICAL SERVICE can do it all! Benefits of routine crane maintenance performed by GD CRANE-

- Small repair issues will be found during maintenance allowing them to be corrected before they cause failures of much more expensive components.
- Reduction of maintenance cost through using highly proficient Inspectors.
- Expert recommendations and advice.
- Equipment life will be dramatically increased.
- Downtime resulting from unplanned failures will be greatly reduced.
- Components requiring repair will be identified before a breakdown so they can be fixed during a planned shutdown.
- In plant maintenance personnel can focus more efforts on other production machinery within the plant.

We can provide you with a detailed analysis of your expenditures for inspections and maintenance, planned repairs and breakdown repairs as well as representation of the condition of the an individual piece of equipment or an overview of the collective condition of all equipment located at a site. In addition, we can give you an analysis of the effectiveness of the current level of preventive maintenance and make recommendations for improvements in the program or with your equipment. Give your local office a call at 416-560-8604 and we will assist you with a program tailored to your needs.
