

## Training

Overhead Crane Training Overhead crane training / hoists operator certification safety course.

Our professional staff of trainers and consultants will teach the basics of safe crane operation and pre shift inspections, so as to increase productivity and efficiency while reducing the risk of product damage, property damage, and accidents. Overhead crane training certification, like some of our other safety courses is also customized for people in the workplace struggling with illiteracy.

### Hoist Operator Certification

Overhead Crane Certification will: Assist employers to meet the Occupational Health and Safety Act requirement to ensure the operators of lifting devices are competent persons Upgrade the material handling practices within the company

Concepts Of The Safe Use Of Cranes:

- Pre-Shift checks and inspection
- Analyze the lift
- Load limits and capacity
- Maintaining a safe distance
- Lifting, moving, placing loads
- Standard safe practices
- Controls and basic operation
- Use of chains, slings, spreader bars, grabbers, and other attachments

How Long Does It Take? Half a day maximum of twenty-five (25) participants per session. All training is delivered on site and scheduled to your convenience (off shifts, weekends, whenever and wherever).

Where Do We Train? Our trainers will train anywhere in North America Please feel free to contact our representatives, if you require further information regarding our overhead crane certification, inspections safety training, or our consulting services.
